# BOND PRICING VALUATION ENGINE

FactEntry is an independent provider of bond data and documents, incorporated since 2007, with extensive knowledge of the global debt capital markets.

We have developed a calculation engine that leverages our bond cash flow data and facilitates pricing of illiquid bonds. Our bond pricing input comes from brokers and market participants along with the traded data. Our (BVE) calculation engine is a result of over three years of R&D with the experienced quant team that has done extensive work with banks and hedge funds.

The Fair Value Data is available the next day for previous EOD before the markets opens.

## Coverage

● EUR    ● GBP    ● USD    ● INR

## Data Fields (Sample)

- |                     |                         |
|---------------------|-------------------------|
| ● Fair Value Date   | ● Z-spread              |
| ● ISIN              | ● Asset Swap Spread     |
| ● Issuer            | ● Clean Price           |
| ● Credit Sector     | ● Dirty Price           |
| ● Country of Issuer | ● Yield                 |
| ● Issue Date        | ● Macaulay Duration     |
| ● Maturity          | ● Modified Duration     |
| ● Coupon            | ● Convexity             |
| ● Currency          | ● Link to Bond Document |
